

SAFETY FIRST, SERVICE SECOND

At Quality Housekeeping, the importance of safety during cleaning is clearly understood. From the most obvious hazards, such as moist or wet floors, to the not so obvious, such as the mixing of an ammonia agent with bleach, Quality Housekeeping adheres to the strictest of safety regimens during each cleaning appointment.

When cleaning in between cleaning appointment visits, we endeavor to always implement the following cleaning safety protocols:

- ★ Reduce slips and falls by placing anti-slip strips on rugs
- ★ Wear rubber gloves to avoid contact with chemicals
- ★ Do not mix chemicals for any reason
- ★ Secure cleaning products away from the reach of children and pets
- ★ Always dilute concentrated cleaning products before use
- ★ Ventilate rooms before you clean
- ★ Always read the instructions before use
- ★ Change out dishcloths often to reduce bacteria and mildew
- ★ Avoid tripping by never leaving loose items, like toys, on steps

If you should have any questions as an employee or client regarding the cleaning products Quality Housekeeping uses in your home or business please call **(281) 377-6125**. Our goal is to provide quality cleaning services to our 'partners in shine' that help reduce the amount of germs and allergens in your home and business and that promote the safety of both our employees and clients.
